How to use this product

The aim of this fun game is to practice the students' ability to recognise and create their own rhyming words.

The pack includes:
- Game 1: 2 x CVC game boards (9 pictures)
- Game 2: 3 x game boards (20 pictures)

How To Play:
This game can be played in a variety of ways. You can choose which best suits you.

How many can play:
- 2 – 3 people

You will need:
- Counters for each person (each person needs to have their own colour – approximately six for game one or twelve for game 2)
- A coin (I sometimes use a dice)
- Raisins, M&M's, chocolate chips, etc.

Aim of the game:
- To get the most counters on the game board

How to play:
The first player tosses the coin. If it lands on heads, the player chooses a picture from the game board and thinks of a word that rhymes with it. For example, 'tree' rhymes with 'bee'. If the player says a correct rhyming word, they put a counter on the picture. The play then passes on to the next person.

If the coin lands on tails, the player miss a go. If they cannot think of a rhyming word, they do not put a counter on the game board. The play then passes on to the next person.

The first person to get three counters (game 1) or five (game 2) counters on the game board is the winner.

- Sometimes I will use a dice. If the person rolls a 2, 4 or 6, they can have a turn at guessing a rhyming word. If they roll a 1, 3 or 5, they miss a go.

- To extend the game, players can play until all pictures have a counter on them. The person with the most counters is the winner.
