ART: 5th Grade packet: I miss you all and can’t wait till we can get back and do artwork together again!

Day 1: Choose an interesting Shoe from within your home, it could be anyone’s shoe. Set the shoe on a table where you can easily see it. Draw a side view of the shoe. Color and or shade the shoe. Be sure to include any patterns created by lines or shapes and use light, medium, and dark values in the drawing.

Day 2: Using the same or a different shoe, set the shoe on the floor and draw it again but this time from the “birds eye” or on top or above the shoe looking down on the shoe. Remember to include the details, patterns, shapes, embellishments, etc. in your drawing. Shade or color to create light, medium, or dark values.

Day 3: Find a shoe you want to use for this project. Put the shoe on.....It doesn’t HAVE to fit, (it could be like the three bears, too small, too large or just right!) think of what socks, etc. you are wearing above your ankle or pants, etc. You are going to look down at your leg and shoe from where you are sitting and draw what you see. Do the best you can and know that this will be challenging. Again, show your patterns and shapes and shade light, medium, and dark values. You may color if you have the materials and want to....

Day 4: Work sheets on texture Practice (see packet) - [p. 48] Look what you can do!
Create 2 pages of practice using [p. 58, 59] Pretty Patterns

Day 5: Grid drawing practice, mirror imaging, (see packet) Bug + Fly
Create the other half!

In the event you would rather choose another art project or drawing, please remember that that is GREAT! Feel free to create a book and illustrate it, or do some painting if you have the materials. You can also practice 5 sketches of objects in your house or create 5 pictures you want to draw. If you get stuck or have questions, please email me at sedwards@kfschools.org and I will get to you as soon as I can. Show me what you are working on, write me about how it is going! I really miss you all! Take care and be safe! Mrs. Edwards

Day #1
Day #2
Look What You Can Do!

Tangling patterns can be used to create many different flowers. Here are some examples of flowers you can add to your garden!
Pretty Patterns
